

#### **WOODROW WILSON BASCULE BRIDGE**

Hardesty & Hanover is the subconsultant responsible for the design of the new 12-lane bascule bridge to replace the existing I-95 Potomac River crossing. Responsibilities include the complete design of the span superstructure, trunnion towers, and mechanical and electrical systems.

## Attention to detail.

At Hardesty & Hanover, we pride ourselves in paying close attention to every design and client detail. Our goal is to provide the highest level of professional engineering services on every project, measuring our success on your satisfaction.
